## Correctional Admissions Medical Screening

- Pre-existing health care issues brought by inmates into correctional settings, especially Police Lock-ups and County Jail facilities, have been identified as the leading causes of in-custody deaths and lawsuits.
- Today in corrections, utilizing custody personnel who lack medical training & knowledge to conduct the initial medical and mental health assessment of inmates, has become a significant liability risk.

***Is your custody staff able to provide you with an accurate initial screening assessment?***

***Can they identify high-risk health issues and suicidal factors?***

***Now there is a better way!***

**CAMS decision tree software** is designed for Police and Jail admission facilities. CAMS will provide your custody staff the objective and defensible medical decisions to better manage your inmate population.

### **Medical Decision Outcomes**

- Immediate EMS Notification
- Medical Contact
- Medical Alert Status
- No Medical Alert - Normal Lodging

### **Medical Supervision Levels**

- Constant Supervision
- Close Supervision
- Normal Supervision
- Restricted / Special Lodging

***Reduce Your Liability While Improving Health Care Service To Inmates***
